

# Fresco Wellant<sup>®</sup>

## Parent plants

 + PRI-Selection x  Elstar

## Origin

Breeding institute Plant Research International in Wageningen, the Netherlands.

## Growth

Fairly strong to strong, however less than Jonagold.  
Tree loses its leaves rather easy.

## Flowering

One to three days earlier than Elstar and Golden Delicious. No pruning required.  
Good pollinators are: Elstar, Gala, Golden Delicious, Junami, Pinova, Rubens, Malus Golden Gem and Malus Golden Hornet.

## Productivity

Good, produces mainly at the end buds, slight tendency to biennial bearing.

## Harvesting

Two to three weeks after Elstar, only just before the first harvest of the good colouring Jonagold mutants.

## Appearance

Large (70/90). Rural, dry and smooth appearance, slightly coarse with clear lenticels.  
Intense clear to deep dark red with a green-yellow base colour, on average 80% blush.

## Quality

Fruit flesh is yellow-white to green-white. Strongly aromatic apple with a sweet and sour taste, juicy, crispy and firm.

## Storage life

Eight months in ULO-storage.

## Details

The apple is selected for the target group middle-aged consumers. This group favours a strong aromatic apple with a clear aftertaste.
